### Section G: State Historic Preservation Act

The State Historic Preservation Act (22 VSA 14) requires that state agencies take into account the effect of their projects on any historic property that is listed on the State Register of Historic Places or may contain scientific, historical or archeological data. If the installation is on a building more than fifty years old or requires ground disturbance for footings and/or trenches, the project plans must be submitted to the Vermont Division for Historic Preservation for review prior to starting the installation. Applicants are encouraged to contact the Division early in the planning process to avoid any unnecessary project delays. To start the review process, please complete this form and mail it, along with the information requested below, to the Division for Historic Preservation. For questions on the historic preservation review process, please contact Devin Colman at 802-828-3043 or [devin.colman@state.vt.us](mailto:devin.colman@state.vt.us).

Solar Installation Site/Address: 4818 Bristol Rd, Bristol, VT \*  
Site/Property Owner Name: Stark Mountain Woodworking  
Installer Name: AllEarth Renewables  
Installer Email: celder@allearthrenewables.com Phone: 802 777 0156

#### Please check all that apply:

- ☒ Installation does involve ground disturbance (footings, trenches, etc.)  
☐ Building is more than fifty (50) years old  
☐ Building is listed on the State Register of Historic Places (leave blank if unknown)

\* site is in Monkton,  
but Bristol Mailing  
address.

Please submit the following information, along with this form, to the address at the bottom of the page:

- ☐ Project Description.
- ☐ Project Location Map and Site Map, showing the location of the installation. *This can be as simple as a Google map annotated by hand to show the location of panels and trenches.*
- ☐ Project Plans (if available)
- ☐ Archeological and/or historic building reports (if available)
- ☐ Photographs of the project area and the structures involved. *For building mounted installations, please include a photograph of the entire front elevation of the house and photographs of the proposed installation area. Photographs can be annotated by hand to show the location and approximate scale of the installation.*
